

Table of Workflow Composer Application Files

Thank you for purchasing a Canon product.

The application file to use for this product differs according to the model of your machine. Select the application file (extension: jar) corresponding to the model of your machine. Even if the model of your machine is the same, the application file may differ depending on the controller version you are using. For more information, see the table below.

For information on installing the application file, see the manuals for Workflow Composer.
